Dees not compete with banks for deposits, nor otherwise, but does an exclusive Trust Company business.

**REPORT NO. 3.** 

material advancement made by this company since report No. 2. We are awake to the realization of the fact that "gushers" slone on Spindle Top mean nothing unless provisions are made for marketing the product after wells are completedce, we have determined to place ourselves in a position to guarantee to our stockholders a large increased value in their holdings and an assurance of early dividends; and to accomplish this we have recently entered into a contract with the American Car and Foundry Company for 500 TANK CARS, to be operated between the oil fields and the CITY OF ST. LOUIS. This is the largest single order ever placed by an oil company in the United States. The first delivery of 100 cars will be made between the 15th and 30th of November; the remaining 400 before the 1st of January.

ters Without Transportation Mean Nothing. We Have Purchased 500 Tank Cars. Remember This in Placing Your Order for Stock.)

Negotiations are pending with railroad companies by which they will be handled in solid traing, and on regular schedule time. The present demands and contracts now in hand will require a solid train daily of 30 cars, and from present indications we can state with an assurance almost positive that the order of 500 CARS WILL BE DUPLICATED within the NEXT 50 DAYS, to enable us to handle the product for which we have the demand and are closing contracts. Our three great "GUSHERS" on Spindle Top are being rushed to completion, and before our first delivery of cars are made, Wells Nos. 1, 2 and 3 will be brought in. Our present contract and deal for transportation facilities have increased your stock to SEVERAL TIMES ITS PAR VALUE. We were compelled to publish on October 20th, without notice, the advance from 10 to 25 cents, and have limited the sale at this price to 15 days only, after which time we confidently predict that the stocks will be advanced to 50 cents or \$1.00. We are also negotiating for A BARGE LINE, to be operated between the mouth of the Mississippi River and Cairo, Ill. It is not, however, an assured fact that this deal can be accomplished, but we shall make every effort to do so if it can be done to the advantage of our stockholders.

We realize that the Beaumont oil is the future fuel of the Northwest, and we are determined that the EQUITABLE LAND AND OIL COMPANY is the source through which it shall be furnished.

If you contemplate making an investment, do not forget that the time is limited in which you can purchase stock at the present price of 25 cents. We are destined to be the largest dividend payer in the field, and at the present price your stock will multiply many times before January 1502. \$100.00 buys 400 shares, \$25.00 buys 200 shares, \$25.00 buys 100 shares, \$12.50 buys 50 shares.

# SUMMARY OF ST. LOUIS MARKETS. SMALL SPECULATORS

and even duller than the usual Saturday short session. The little trading done was within extremely narrow limits and mostly in the way of selling to avoid the risk of carrying long lines over Sunday. Foreign markets were fairly strong, and news from the Argentine was as bullish as at any time in the week. As an offset, it was reported that Northwestern houses were selling their holdings with the belief that receipts of

spring wheat this week would be sufficient to replete the shortage. Corn was weak, partly in sympathy with wheat and partly because of heavy recelpts and a light export demand. Trading was extremely light and fluctuations were small. Oats were the only strong grain in the market. Prices were up on the basis of a good cash demand. Dec wheat opened 1/2 off and closed 1-16c off. May wheat opened se off and closed unchanged.

Dec. corn opened 15c off and closed 15c off. May corn opened 15c off and closed with a loss of 4c.

May outs opened 1/21/4c up and closed 1/21/4c up. Produce in the local market was practically unchanged. Receipts were fair, but there was only a moderate demand except for top-grade stock, which was firm at

nuoted prices. Potatoes and cabbage were strong. Fruits were steady. The feature of the local stock and bond market was the strength of tractions and rust company stocks. There was a fairly good volume of trading, and the excellent

nquiries ipndicated a bullish feeling throughout the list. Banks and trust companies reported a good half-holiday business, with discount rates firm between 5 and 6 per cent for call and time loans. Yesterday's bank clearings

were \$5,161,546; balances, \$581,804. LOCAL GRAIN MARKET ALL STOCKS WERE HIGHER,

### LACKED GOOD SUPPORT. WITH INCREASING DEMAND.

the miscellaneous group.

OATS WERE ONLY STRONG TRACTIONS AGAIN LED -LO-SPOT.

Wheat and Corn Trading Was Trust Company Stocks Were Ac-Light, With Downward Tendency.

Yesterday's grain market was dull and weak, with almost no trading, and the usual Saturday liquidation. While Argentine news was still bullish, there was a slight falling off in the export demand, and ommission-houses had few outside orders. bonds and trust company stocks again led Foreign markets were uncertain during the greater portion of the session, but were teady and fractionally higher at the close. Northwestern weather conditions were again favorable to the movement of the spring crop, and holders of grain at Minneapolis and Duluth were freely selling against the contemplated receipts expected to arrive this week. Corn was weak on a falling off in the export demand, increased receipts and lack of support. May oats were the only strong spot in the featureless and

inactive market.

Dec. wheat opened 1/2 off at 721/2723, sold up to 725/2c, which was the closing price, 1-15c off. May wheat opened 1/2c off at 755/2c, and closed unchanged at 755/2c.

Dec. corn opened 1/2c off at 575/2c, and closed 1/2c off at 575/2c, and closed 1/2c off at 555/2c.

May oats opened 1/26/2c up at 257/2c sold up to 1/2c and closed 1/2c off at 55/2c. from Wall street, where United Railways and St. Louis Transit paper has been steadily bid up and firmly held for several days. The most active of the group yesterday was United Railways preferred, which opened with \$81.75 bid and \$2.25 asked and sold at \$2 and later at \$2.25. At the close \$2 was freely bid, but the stock was held at \$2.25. St. Louis Transitw as next in favor, with sales of \$29 shares at \$27.75. after which it was held at \$25. Five \$1.000 United Railways 4s sold higher at \$39.25.

In the banking list the biggest advance was that of Fourth National Bank, which was bid up from \$25 to \$299 and bought at the latter figure. Mercantile Trust was higher for both the old and the new issues. State National Bank was bid up from \$157 and bought at \$190, \$190.500 and \$191. Mississippi Valley Trust was bid up rapidly, a small lot changing hands at \$45.50. Union Trust also was in demand and bid up from \$70 to \$766, and purchased at the latter price.

STOCKS AND BONDS IN BOSTON. Boston, Mass., Oct. M.—Money, stocks, bonds and mining shares were quoted to-day as follows: Money.

Mining Shares.

Mining Stocks in New York.

Washington, Oct. 25.—To-day's statement of the Treasury balances in the general fund, exclusive of the H55,506,000 gold reserve in the division of redemption, shows: Available cash balance, \$170,-429,837; gold, \$105,659,762.

Big Business in Diverces.

SPECIAL BY CABLE.

Paris, Oct. 25.—Statistics of the French divorce court show that 25 per cent of the applications during the last year have been granted. Many of these applications were made before the honeymoon was over, and more than 75 per cent during the first ten years of matrimony. Contrary to the ordinary opinion, over half the divorces granted were to laboring people.

ARE IN THE DARK.

WALL STREET MAGNATES ON BOTH SIDES OF MARKET.

Big Deals of the Week Had All the Ear Marks of Pure Manipulation-The Money Market.

New York, Oct. 26.-There was a hesitating, irregular stock market to-day, until the appearance of the bank statement on the tape. The unexpected increase in the ash reserves of the banks of \$1,592,900 prompted the bears to cover their short lines and rally the market generally to above last night's figures, although the net changes generally will be seen to be insignificant.

Missouri Pacific Advance. There was positive independent strength in Missouri Pacific, which advanced to 2% above last night. There was no news to explain the movement, and the sympathetic effect upon allied stocks was slight. People's Gas made a good recovery from re-cent weakness. St. Paul was active and fluctuating, and received the full benefit of the late covering movement. Amaignmated Copper was heavy throughout, with news of the shutting down of the company's mines, and in the late dealings the stock broke 2% under last night, interrupting the recovery elsewhere and making the closing

recovery elsewhere and making the closing irregular.

The source of the receipt of cash by the banks is a mystery, as known movement of money indicated a loss of upward of \$50,000 for the week. The loan item reflected the continuance of reborrowing by debtors, who are paying off foreign loans.

The weekly reatement of the Bank of Germany shows a recuperation in cash resources of over \$12,000,000, with a reduction of loans and contraction of note issues of about equal amounts, but sterling exchange declined in Berlin again to-day, indicating continued pressure for gold there. There remain some requirements to be filled at New York for remittances to London on account of subscriptions to the issue of consols, an installment on which is due November 1. The question of gold exports from New York next week is, therefore, an open one. Exchange. There was no falling off in the

Recovered From a Depression. looming up on the financial horizon has been a source of strength to the local mar-ket ever since the popular adoption of the Charter amendments, and has been the mainspring of bullish action in the bank and

Recovered From a Depression.

After falling into a lethargic condition early in the week, the stock market developed a degree of activity and strength later. The buying which was responsible for this advance was large and concentrated in its source and congested in a few stocks, shifting from day to day from one group to another.

The movement was initiated in the Chicago and Northwestern stocks, shifting thence into the Vanderbilts generally, then into St. Paul, Union and Southern Pacific, and then into coalers. The industrials and specialties have moved independently, as is usual in periods of irregularity in the general market.

A notable feature of the market was the evident predominating professional character of the operations. Commission-house, which usually operate on orders from the general speculative public, have been conspicuously in the background during the week. Brokerage houses usually employed by the great financial interests in the street have executed large orders on both sides of the market, leaving the uninformed public confused as to whether those interests are committed to the long or short side of the market.

Element of Doubt Strong. market.

committed to the long or short side of the market.

Element of Doubt Strong.

Doubt and uncertainty, in fact, are still the prevailing sentiment in speculative circles. Some of the buying has been attributed to progress towards a settlement of the Northern Pacific controversy. If insiders have bought stocks for that reason, it is on information of which the public is kept in ignorance. The actual developments show a condition of that controversy so far from settlement as to promise a progress in interest.

That negotiations are in actual progress is clear, but it is also clear that these negotiations are now first undertaken on a subject which Wall street assumed was definitely settled when Mr. Morgan announced the members he had chosen to balance the Northern Pacific Board of Directors. The various statements given out on authority of President Hill of the Great Northern and of the Harriman-Kuhn-Loeb interests clearly show divergent views and the holding to them with determination.

As contrasted with Mr. Morgan's experience of the statement of the Burlington purchase bonds, is to be a factor in the settlement as well as the contending interests among the actual stockholders in Northern Pacific itself.

Hill-Morgan Rumors Contradictory.

string interests among the actual stocknodes for in Northern Pacific itself.

Hill-Morgan Rumors Contradictory.

The Hill interests have insisted upon their contention that Northern Pacific preferred is to be retired in accordance with the powers of the content of the company under the reorganization plan. The effect of this would be to out the Harriman—Kuhn-Loeb interests from their control, which is through preferred stockholdings, and leave the Morgan-Hill majority of the common stock in control of the company. The Union Pacific party is equally insistent that their control of the disputed property is not to be relinquished.

The recent buying of Northern Pacific preferred is supposed to be by this party. It is admitted that numerous legal and technical obstacles exist to the adjustment of ownership of a railroad company by competing or parallel lines. In the bare outlines it seems clear, therefore, that many difficulties still exist in this puzzling problem. Until they are definitely cleared up a depressing factor will overhang the stock market. Importance is attached to the money disturbance in foreign markets as bearing on the large foreign credits which have been used to carry the large holdings of Northern Pacific ever since the lock-up in May. Repayments of these credits which continued to sustain the foreign exchange market this week, as for some time past, and the course of the loan account of New York banks shows that this burden is shifted upon domestic credit institutions, waiting upon the Northern Pacific settlement for relief.

The Money Market.

The Money Market.

The Money Market.

The Money Market.

The usual inflow of gold to this country is thereby interrupted except as the Australian remittances can be substituted. The calling home of French credits seems to be for the purpose of meeting heavy losses incurred by French capital by over-investment in Russian industrials. The Economiste Francasis estamtes that the shrinkage in valuation of Russian enterprises in two years is not less than 90 percent, which would represent losses to French investors and speculators of 530,000,000. The long process of liquidation in Germany also continues, following the collapse from speculative inflation. The maturity of obligations at the year's end in those two countries and Great Britain's continued necessities for the conduct of military affairs in South Africa indicate a strained period at that time which is likely to be reflected over the whole financial world.

As to immediate money conditions in New

world.

As to immediate money conditions in New York, the Government surplus is making renewed demands upon the market, now that the Government bond redemptions have ceased, the receipt of over 12,000,000 Australian gold this week having failed to off-set this drain. The Southern demand for cotton-crop money is still a factor.

Railroad bonds have been in improved demand at advancing prices. United States refunding 2s declined 1/2 and old 4s 1/2. The 2s advanced 1/2 above last week's, closing dull. Curse
